

Personal Information

Name: Amirhossein
Surname: Mohammadi
Gender: Male
Born: Nov 20 2003
Mobile: [+989014784362](tel:+989014784362)
Email: amirhosseinmohammadi1380@yahoo.com
Webpage: amirhossein.info

Fields of activity

- Mobile development in iOS and Android platforms
- Front-End development with ReactJs library
- Using Firebase Services as Back-End | React
- Launch web projects in bed of Docker
- Launch and create WordPress websites
- Launching Linux and Microsoft services
- Web development in both server and client sides
- Back-End development with Laravel framework
- Using Firebase Services as Back-End | Flutter
- Launch web projects in bed of Apache and LiteSpeed
- Design and use APIs
- Having knowledge of Git control version and Github

Top Skills

- Firebase
- React
- Laravel
- Flutter

Other Skills

- Flask
- Github
- Gitlab
- Git
- Php
- Python
- JavaScript
- Dart
- Bash
- Manjaro
- Ubuntu
- Linux distros
- Sass
- jQuery
- Font Awesome
- Google Fonts
- Material Design
- Bootstrap
- Responsive
- Blade templates
- MariaDB
- PostgreSQL
- SQLite
- SQLite
- Hroku
- Github Pages
- Netlify
- Fandogh PasS

Favorite researching fields

- Cloud computing
- Fog computing
- Virtualizing
- IoT

Experiences

Narben Information Technologists, Iran - Tehran

Nov 2021 - PRESENT

- Software developer

Narben, Iran - Tehran

Apr 2019 - Nov 2021

- Web Front-End developer
- Web Back-End developer
- Web application support
- Web application troubleshooter and tester

Passed courses

Developing Front-End with ReactJs 2021

I use React to develop applications with Firebase as Back-End, using Axios library to work with REST APIs. When I create a mobile app with Flutter and Firebase, I won't use Laravel or any Back-End frameworks. Because React can integrate with Firebase and then, we have applications for mobile and web.

- Functional React development
- Integrating Firebase with React
- Integrating Cloud Firestore with React
- Hooking APIs with Axios

Developing Back-End with Laravel 2021

I started learning Laravel after 2 years of coding with pure Php. After that, I started to read the official documentation to know Laravel better and get deep in it.

- Laravel Model, Controller, Migration
- Eloquent ORM
- Laravel Authentication
- Laravel deploying in Heroku PasS
- Blade templates

Developing mobile apps with Flutter 2020

Before learning Flutter, I was a native Android developer with Kotlin. I know what Flutter is but I haven't ever tested it. I learned Flutter and integrated it with Firebase.

- Local database provider | SQLite
- Firebase authentication
- Firebase Cloud Firestore as NoSQL database
- Material components
- Cupertino components

Writing and speaking languages

- English
- Persian
